

I. m.
July 4: 1816.

Dear Sir,

Not having yet received yours of
the 26 June I cannot have any thing to answer or re-
turn signed. At present as the time of our departure
from hence approaches and I may have a good deal to
do tomorrow I take up my pen to state again to
E. P. that judging by the weather there here he
must be deep in the hay harvest and I therefore
wish the drains to be made in the fields of
Shutter Field the Green House Field and Robin's
Field to be made the moment the hay is cleared from
these various fields. As soon as the Cuts are carried

out of the Manover Field the drains there also must
 be completed. I meant to know how the seed have
 done in the Dam Field and I expect ought to
 see the drains turned in the Upper Home Field
 before the Perispare sowed there. The moment the
 Green Corner Field is clear the sheep must begin
 to come to the field and from the stile near his house
 near Kingdon's wares to Sir: Campbell's Wall. If
 you have the same need then we have it is parti-
 -cularly favorable for the printers.

I am so much better and the Doctors say they will
 have completed their courses of the waters with
 the week that we fully propose leaving London this
 instant. I trust and believe they will both have joined

spent a last permanent benefit here. I never remember
- less in Europe a summer without so hot and this
place from its locality is so warm I really think
myself back again in the West Indies. I shall not
be sorry to change the air. The Cons is so singularly
beautiful. He admires the quietude and serenity
- of farming and certainly for a short time does not
dislike being in the Continent yet I am not sorry to
think one third of my time for being overseas
and it must be some thing very extraordinary in
- deed that can prevent my being at Calais on the
First October and reaching here in the evening of the
second. But by and by I shall hope to find you in high

leath and spirits. I cannot have any news for
all the people have literally thought of nothing
but their waters and eating and drinking and re-
dying in a pos in the evenings. The few many
of very high rank and consequence in various
countries. I wish to pleasure and a total
forgetfulness of every thing that is business and
the order of the day at a German Bath. I am sure
you believe me in word of England.

Yours most truly
W. Pitt Rivers
