

Windsor Castle
 Oct. 16th

My dear Lady Eliza I am most grate-
 ful for your most interesting
 & touching letter which has given
 me great comfort & satisfac-
 tion; for I had been very
 anxious about your excellent
 I had heard of the melancholy
 event which took place in
 your family. Thank God
 you seem now fully re-
 stored under your great
 affliction & bear it, as a
 true Christian with pious
 resignation & cheerful submis-
 sion to the will of our Mercif-
 ful

Father in Heaven. The recollection
of all what you have
done for your dear departed
Child must ever be a com-
fort to you & the certainty
of a happy & peaceful
rest will far outweigh
better words will ever
reach your just grief
of having lost her for
the time you are in this
world. I cannot tell you
how much I regret the loss
of little girl, who had won
my heart so completely
when I saw her at first
ton. Her manner & whole
appearance was so particularly

the pleasing & agreeable. What
must your feelings be
when I had my little
repart in my mouth?
Hence the thoughts of
her perfect happiness now
will, I am sure, be a
great consolation to you.
I am so grateful to you
for all the interesting details
which you have given me
of the last days of the dear
little Angel. Glad to see
you again & to hear more
of her. What a happiness
it must be to you to have
possessed such a perfect
child & to know for certain
that she is your's for ever.

It is an unspeakable blessing
which will not fail to have
it's beneficent influence
over the rest of your life.
I hope at least that the
Change of Air will do you
all good & that your health
will recover. The shock
it must have sustained.
I have not been well lately
my wife was much increased
& I have been persuaded to
consult Dr. Chambers, who
came here a few nights ago
& ascertained the state of
my lungs & chest with
a new invented Instrument.
He has found no disease
either on the lungs, or

found the drops attacked by
James illnesses, & was found
great and a most valuable
is required to prevent any
new attack coming on
again, as great weakness
& delicacy exist. - It has
given my son strength
and I have had the
benefit on my chest which
I think have been useful.
I am getting better, but
saw the winter which al-
ways brings down with it,
particularly at Brighton.
The King, thank God is
quite well & wishes me
to give you a good bye
his sympathy & wishes.

Dear Mr Augusta is unwell to
with a chill, which I
confines her to her room.
The Dr of Lancaster also
falls the efforts of the
damp weather, & has not
been quite so well lately. The
Ship in Town will follow
as to the Pavilion early in
Sept. We are going there
on the 20th of the month.
You will be glad to hear
that Mr. Wane is going
on next week. He has been
on the open carriage
again since Thursday is
all the better for it.
Miss West is gone over
to Paris with Mr. Mansfield

to be cheap of his & name.
If you go to Paris, you will
probably still find them
there. Miss W. is much
wetter to you. — You are
too good to offer doing
Commissions for me, but
I have nothing I wish to
send from Paris. —
I beg to give my kind re-
membrance to Mr. & Mrs. & all
your children.
God bless & comfort &
protect you & pray be-
lieve me ever with sincere
Attachment
my dear lady
Yours most affly
F. J. W.
Millaire
