

New Patent Detonating Guns.

JOSEPH MANTON has the honor of acquainting Noblemen and Gentlemen, that he has obtained His Majesty's Patent for Detonating Guns; the advantages are, they shoot much stronger and a hundred times quicker, they cannot hang or miss fire, and may be shot with a thousand times in any weather, without ever varying in quickness; and what is remarkable, they will fire with the same degree of rapidity when the touch-holes are covered with wax, wet wafers, card, or thin sheet lead. The construction of these Guns is scientific, simple, and elegant, and the workmanship surpasses any thing hitherto produced. They are much safer to shoot with, having neither flint, hammer, pan, or magazine.

JOSEPH MANTON flatters himself, from the great satisfaction these Guns have given to those Noblemen and Gentlemen who have shot with them, and from the number of orders he is constantly receiving, that there will not be a Gentleman Sportsman in England without them.

Davies-street, Berkeley-square, London.

His Royal Highness
the Prince Regent } *to Joseph Manton*
Nov 27 1816 - 2 Patent Detonating Guns - £174. 6. 0
