March the 22

My dearest Mother

The Doctor has got
a slight attack of the Erysipelas
which disfigures her sooty as
I never saw her face so swollen
before - I don't think she feels
so unwell as usual with
that complaint, but she is
always alarmed when any
thing is the matter with
her & Mrs Beckwith's frightens
her more than her own
sickness & has made her
to send for Sir J. Milnes
when a person as it is
of her consequence, but that

she must take care of herself
for a few days - Myself & the
King is better & the King
is most perfectly recovered

Yours

Mary
