

1809

Oct^r the 21th

My dearest Papa

I am most happy to be able
to say Amelia passed a better day yesterday
indeed concerning your news you wrote
to you as little much pleasure —
She was in the Boat for near an
hour & certainly it must off better
than any day yet as she was
less faint & less fatigued since
you came in towards evening
but she has had a better night
fuls languor to day & more
disposition in the head & feet
Became fresh the Pulse full
however does not appear at
all disinterested about her
& desired her the mother
being so well to go on the Sea

1809

~~Had~~ the great wish for having been
some way for the sake of seeing
you every hour & there, she never
proposed returning because she
to any one before in particular
but I told her fairly and her
own opinion I suppose she
from the first, when she
came to Regent's the last
time she he told her she
could not return to the
little therefore from the
first she made up her
mind to the impossibility
of returning to her own
apartment - She then bent
slightly to Longmore & Row
at the same time desired
Ansted not to enquire any
place of residence in her letter

to be understood as he did not wish
that to be talked of till he had
seen Sir J. Bouverie & that
only had caused her silence
as well as being from the
part of another very dear chief
where these two gentlemen
will answer they do not
agree — So far you remember
has no more for any one
particular place but
only object is to get well
& she thinks if more
under Pope's own eye
be necessary to offer them
to pursue the Colonel
in longer dress which
he would not venture
to do if he was not near

been advised by any medical
 person as the effects of it are
 never been recommended &
 was it not with the idea
 of being near a skilful
 person to execute the progress
 of the Colicinal (if that
 system is the one to be
 followed up) I should demand
 an other journey as has
 my former state —
 added to that I can not
 disown to you powerful as
 it is to me to be obliged
 to say as that inderwent
 as Amelion is from the length
 of the strops any hardships in
 a sleep must give my wife

with
 as to
 com
 ent
 refer
 now
 at
 when
 the
 from
 on
 me
 I am
 from
 from
 from
 all
 but
 with

with her & if she is so situated
as to be liable to have these
concerning me & and she can
not with any propriety
refuse to see I can not
know for the consequences
at present knowing even
what the effect was before
she came here & I can
show some letters since
one of my mother
in case I have used her
I am the last person that
can any right to complain
I myself, as nothing can be
written or more left than
all the letters write I see
but upon me and
which is my being about

from home & making myself
as necessary to America
which is not thought right
& considered as subjects of
America - If that is considered
to America you must
perfectly understand it
will half kill me when
really from such news
thanks of yourself & my
wishes to you as well as
little trouble as possible
and I am sure you will
give me the credit
to believe that nothing
but poverty & justice in
a suffering & state could
ever make me wish to
be absent in America & I am

From a pen all I have &
entirely in sincerity, but as
the Lord can express
so much pleasure in being
living with her don't you
think it would be honoured
of me and I to write to
her her and with a
moment — I am told
my health will suffer
I am you I mean now
in better health in all
my life & I am sure
I am always yours and
strength to go through
trials I get out every day
for an hour & a half
and in bed before 11 & up
at 9 every morning and out

before breakfast - very excited
This secret & please see
Gruffe Dolupre
