at the 10

My dear Madam - Your kind letter
 gave me the greatest possible pleasure
 & I need scarcely hope & trust
 your health with care may not
 fall a sacrifice to so much fatigue
 & anxiety - I flatter myself you
 get into your garden every day
 this cold weather must do you
 good - I quite rejoice to hear
 that your family have been able to
 make you so long a visit, &
 tell me of little Pollianna's
 continuance so cheerful & sound
 a boy as when I was born
 at London - he goes in just
 the same of any thing the
 two Kings desired to know
 but I have compared this
 last week as last one and
 was surprised if any or any
 the circumstances they were
 given a visit & improvement

I remain however & I for myself
 have hoped to see the the the the
 when the the the the the
 would the the the the the
 in the way of the the the
 treatment or the the the
 looks upon it quite as a the
 case therefore was the
 I would to see the the
 here — they all the the
 that every thing the the
 done that the the
 they were the the
 in this the the
 in one thing to the the
 has not been the the
 with as to the the
 conclusion — they are the
 from any the the
 as all the the
 to the the
 paper & they the the

attacks for the last so many
in his chest & lungs - I say
from water in the chest but
has not told him so yet -
I hope you will feel as better
I am sorry to find you are still
so unwell - my best love
to William & Maria from
the Mother I shall
write you letters in a few
days - Yr affec^d Mother
