

Mrs Elizabeth

Sep. 28. 1807

My dear Mr Adams —

You will be surprised to have
 a note from me, but as I know
 how interested you are about our
 sweet Nancy I think you may
 wish to know, that she has got
 the Chicken Pox remarkably
 well, she desires me to tell
 that after the shock you
 have lately had, & things are
 running all of a piece so much
 as regards, she thought it
 better to make me trouble
 you with a letter which I
 promise to write you every
 day when she is quite well

She is not very full but quite
enough so but perhaps of first look
may so pretty as usual we told
Her that she would not have
a looking glass brought to her
She has one large one under
her eye & the most powerful
one under her tongue. She
desires that you will not be
sneaking for you shall know
the truth eventually from
me —

I cannot say how much I
have felt for you in the
last year had in your
room, I sincerely hope that
your health has not suffered
& that you soon in some
way recover, what at first
