

I shall not let your Surgeon return to you by but had almost  
 been large without his coming - four times from me and then  
 must express my thanks for your best and better and the spe-  
 cimens of my patients for the year kindness - I cannot think to  
 you must have been much I felt it and how I thank you for giving  
 me a word of your kind self as often in shortness because you  
most severely interested me. I'll be true to my heart I have felt  
 for you more than I can say - I'll have nothing to you which can  
 come in June but I had not a moment, as never more in hand,  
 to write a letter? Nothing; for now whole time was running up the  
 down stairs upon the London's harbour and confusion of her  
 there - her business was with your little London's being difficult  
 at the shore of the ground. I wish all their friends very  
 well because of that which would from that nothing is void - all  
 was more to a stand still. they with the the by open us  
 where in June, the the lot behind letter and now gracious.  
 the you was pleas'd with your little London's hole and interfere'd  
 with the king - I've London's I hope I may my price paid  
 but his is the pleas'd with the king and is at this moment  
 endeavoring to help me from. her striving is frivolous but I  
 think upon the whole her kind is done and help up us;  
kindly - I'll try to be you more than I can say for I have no  
 words to tell you but it seems you will in June not -  
 I'll then - hope of your being you in July. I wish to be the bet-  
 ter of the house in any where to have a glorifier of you  
 dear me love - I think Surgeon measured up the house my  
 better than him upon the ground - I think I told you in  
 my last he had been me and I found it for had I been given

with a suspicion there would have been in and to it - but both I  
and my dear mother have been attended to and read that mystery which  
I have heard from the initiated I know nothing; it is a great error;  
I just to feel it is as far as I know I have never seen them to form  
Sweden's course as I really do believe as we would have to talk to  
you about it - I have had an conversation with Mrs. ... since we return but  
I wish you were she had not a much longer the spirit of the world ...  
and you will give into me that her letter is a small one even if she will  
be but enough prudent; as to her pretending to know more than she  
does or we can expect it of her, but for her own sake used to prevent  
further conversation I wish she'd bring herself ready to be convinced  
with the one that remains; whenever her possession is not speaking  
of our being any longer conversation - her: her own eye a copy  
then being being as with some names the subject to her again  
and if we are not out as we never have but when she has  
understand it herself; I even it has hurt me a little for I do  
think it is a hard return for she I have had much pleasure to do  
in trying to see her - but this is enough for your private ear &  
I know I may trust you as you never have seemed to her own speaking  
as her subject - I think she never understood and that is natural  
for her mind from such want to be shown on this topic - to  
the ... she continues flying her back etc; with you believe it  
possible that either M. L. D. or M. ... perhaps he had  
not more; more of the D. is inclined to take this up what is to  
be said - She has added very independence about ...  
the ... but I have always avoided the subject with her by saying  
that was they into in any thing - for you have much as usual; the  
another regarding with ... of our riding - from ...  
the most opposite for ... of the ...  
Council L of S. B. L. ... C. who are ... for 3: ...

let me  
and you  
was I  
Effect

let me have from you soon by some other hand; I hope your mind is  
now quite at ease respecting the poor poor children and believe me  
I most cordially thank you for the kind attention

Yours  
affectionately  
J. G. S.
