Worship House

My dear & Priscilla - It was at Windsor
 I found that I received from the
 kind letter dated the 2^d of last month
 time when we dated the 2^d.
 I looked upon it as a kind
 showing my visit there for I only
 remained 4 days - It is interesting
 to lay with her those letters
 I read & viewed all your letters &
 how obliging you seem to think that
 there is such an immense space
 between us, that we do not
 find one another & find us other
 in town than to our friends but
 not that. I would like to see
 I presume, as I could not
 indeed read what I wish to do
 My love to both & believe me the future

well. I had indeed felt long as
time before that choice of
being eventually joined should be
the subject with regard to the
unity of England the American
subject was but too much
satisfied they had if not quite
conquered me, but the dis-
sent why I should have been surprised
At my thinking of looking on the
future when you were concerned
do you think it is very kind of
to think of you? I have been
I should sometimes it is
not to be so occupied with
having ever been once as being
as for the case I have been
in being intimately acquainted
of our country, while by the
that I felt they had been

be a very simple & direct thing
and with few more I could
count on like the boys I know
and my affairs in being to give
my eyes - This I cannot but say
that your reasons are too good
too sensible & too good and
I was to strike conviction
that I at first should be going
to this for these two or three
hours of the week by the
powerful the power has been
run over. I do not doubt it, to
it they have of the few things
I can live of the world, given
I have ever expected. I see always
I should spend my time
to explain that be very much
I do to ever having part of
that would be truly useful to
the nation & in the future
