

2038

It seems necessary to discover if there be not a peculiar proportion between the parts of a Farm favourable to profit and convenience.

The first division is into Arable and Pasture Land

Suppose in stocking the Farm 15 Acres of arable land per Ox is the quantity to be managed properly by the Team; since Oxen will in that case cultivate ~~sixty~~ <sup>sixty</sup> acres of arable land.

These ~~sixty~~ <sup>sixty</sup> acres may if the soil be not heavy, be thrown into fourths. One with Wheat, one with Turneps, one with Spring Corn & one with Clover. If the soil is heavy, Beans or Faves must be introduced instead of Turneps.

The names are very faintly written at the top of the page.

The following is a list of names and their corresponding...

The names are listed in a column on the left side of the page.
