Piches in the hand of a Beneficent Man are a Blessing to the Public; such a one is a Steward to Providence, and the noble Means of correcting the Inequalities of Fortune, of relieving the Miserable, and spreading Happiness to all that are within the Reach of his Acquaintance.

The first of these is the paper itself.  
 It is a fine quality of paper, and is  
 made in the following manner. The  
 paper is first made in the form of  
 a sheet, and is then cut into  
 strips of the required width.  
 These strips are then pressed  
 together, and the result is a  
 sheet of paper of the required  
 size and thickness.

True eloquence is good sense, delivered in a natural and unaffected way without the artificial ornaments of tropes and figures. Our common eloquence is usually a cheat upon the understanding; it deceives us with appearances, instead of things, and makes us think we see reason, whilst it is only

tickling our sense.

 question.

The first of these is the  
 fact that the population  
 of the world is increasing  
 rapidly. This is due to  
 a number of factors, the  
 most important of which  
 are the increase in the  
 birth rate and the decrease  
 in the death rate. The  
 birth rate has increased  
 because of the improvement  
 in the standard of living  
 and the increase in the  
 life expectancy. The  
 death rate has decreased  
 because of the improvement  
 in the medical science  
 and the increase in the  
 standard of living. The  
 result of these two factors  
 is that the population of  
 the world is increasing  
 at a rapid rate. This  
 is a cause for concern  
 because it will lead to  
 a shortage of food and  
 a shortage of living  
 space. It will also lead  
 to a shortage of jobs and  
 a shortage of resources.  
 Therefore, it is important  
 to take steps to control  
 the population growth.  
 This can be done by  
 increasing the birth control  
 and by increasing the  
 death rate. It is also  
 important to increase the  
 standard of living and  
 to improve the medical  
 science. Only by these  
 means can the population  
 growth be controlled.  
 The second of these is  
 the fact that the world  
 is becoming more and  
 more dependent on the  
 oil. This is because the  
 oil is the most important  
 source of energy. It is  
 used for the production  
 of electricity and for the  
 production of the most  
 important of the modern  
 machines. It is also used  
 for the production of the  
 most important of the  
 modern materials. The  
 oil is also used for the  
 production of the most  
 important of the modern  
 fuels. The oil is also  
 used for the production  
 of the most important of  
 the modern chemicals.  
 Therefore, it is important  
 to take steps to control  
 the oil consumption. This  
 can be done by increasing  
 the efficiency of the  
 oil consumption and by  
 increasing the use of the  
 alternative sources of  
 energy. It is also  
 important to increase the  
 standard of living and  
 to improve the medical  
 science. Only by these  
 means can the oil  
 consumption be controlled.  
 The third of these is  
 the fact that the world  
 is becoming more and  
 more dependent on the  
 nuclear energy. This is  
 because the nuclear energy  
 is the most important  
 source of energy. It is  
 used for the production  
 of electricity and for the  
 production of the most  
 important of the modern  
 machines. It is also used  
 for the production of the  
 most important of the

 nuclear energy is also

 the modern chemicals.  
 Therefore, it is important  
 to take steps to control  
 the nuclear energy  
 consumption. This can  
 be done by increasing  
 the efficiency of the  
 nuclear energy  
 consumption and by  
 increasing the use of the  
 alternative sources of  
 energy. It is also  
 important to increase the  
 standard of living and  
 to improve the medical  
 science. Only by these  
 means can the nuclear  
 energy consumption be  
 controlled.

disappointment is no less certain.

Friendship has a noble effect upon all accidents and conditions; it relieves our cares, raises our hopes, and abates our fears. A friend who relates his success, talks himself into a new pleasure; and, by opening his misfortunes, leaves part of them behind

him.  
August 23: 1774.

Liberty should reach every individual of  
a people, as they all share one common  
nature; if it only spreads among particular  
branches, there had better be none at all,  
since such a liberty only aggravates the  
misfortune of those who are deprived of it,  
by setting before them a disagreeable  
subject of comparison. August 23. 74

When men suffer their imagination to amuse them with the prospect of distant and uncertain improvements of their condition, they frequently sustain real losses, by their inattention to those affairs in which they are immediately concerned.
