

A. H. G. North

4264

Windsor July 14. 1781.

The draught of the speech fully deserves my approbation, I am not therefore surpris'd it met with the concurrence of the Cabinet yesterday, I hope by Monday that I shall receive the fair copy of the Draught with any alterations that may occur on having communicated it to the Chancellor, if the Parliament can be up on Wednesday I desire Ld. North will give notice to the Chancellor and the speaker that I will that Day close this long session, and to Ld. Stormont that a Cabinet may be held immediately after the time for the communication of the speech previous to my going that day to Parliament.

The more I reflect on the merit Ld. North gave me on Wednesday of D^r Balguy as a proper person to fill the See of Gloucester, the more I am convinced he is the first Man in point of reputation in the Republic of Letters of either University; besides it was he that put an end to the Meeting some Years ago at the Feathers by the Charge he published at that season of Winchester; I desire Ld. North will therefore without loss of time offer in my name the See of Gloucester, should he refuse it.

it, which I do not expect, I know the offer will do good
and no other person can think it a Dishonor to be called
upon of by so Superior a Man.

Enclose Ld. Stormont's letter concerning the
varant Scotch Office that Ld. North knowing he has
he says may be the better enabled to draw him out
of a mistake; if Ld. Stormont was to see the Advoca
perhaps that would be the best means of clearing it up
who I believe can with truth say that my name had
used in the transaction.

Enclose the last letter from Aristarchus not for the
excellence of his Intelligence but because he continually
Duns for a continuation of the Pay for his Expences
I therefore desire Ld. North to direct Mr. Robinson one
more but to give him a note at the same time declaring
the Intelligence must now cease for that he is not to
continue the pay any longer.
