1791

Present  
Lt Millsborough  
Lt North  
Lt Amherst  
Lt Stornant.

Intelligence having been received that a considerable armament is preparing at Brest with a large Train of Artillery five Regiments of Infantry and at least seven Ships of the Line some accounts make them Ten under the Command of M. de Vaudouin late Governor of St Domingo who will be ready to sail the middle of next Month. It is the Opinion of this Meeting that it would be of the greatest consequence to intercept or even to retard this Squadron which is probably destined against

against Jamaica and that D Sandwich  
be desired to report to the next meeting to  
be held at F Stormonts Office on Monday  
next at Twelve o'clock His Lordships  
opinion as to the most effectual Method  
of carrying this Service into Execution  
agreed that it is highly expedient that  
the earliest Intelligence be sent to the  
Governor of Jamaica of the supposed  
Design of the Enemy and that a Swift  
Sailing Vessel be prepared for that  
purpose.
