

Sir

74305

I have sent you the books of Abstracts for the year 1754. & beg you will present one of them to Her Royal Highness, and that you may be satisfied of the justness of my account, without giving y^r. self too much trouble, I have compared the year 1754 with that of 1753. & show'd their difference, & the causes of it.

I hope you will not think that $07:3:0\frac{1}{2}$ is any great matter in the increase of Highnesses. But when if I had charged 6^s per day, as I have formerly told you, it would come to, it would have amounted to 100 ..

As to the increase of the Household I must refer you to the Clerks for satisfaction, or to the Abstracts, as you shall think proper.

I hope the inclosed will give you full satisfaction, and that on examination you will find the account very exact.

I last night rec'd. half a Doe from a friend in Hertfordshire, & because there has been scarce any good Venison this Season, I take the liberty to send you the haunch, which I think is very good, & beg your acceptance of it.

I wish you health & many happy new years, & that you will believe me

Sir

Leicester Street
January 4. 14. 1755.

Your most faithfull
and most obed^t
Humble Ser^t
John Grove
