My dear Brother

I am sorry to say the
King was seized a very indignant day
They gave him some Emetic - Looze
which made him first violently
sick at two different times & a great
deal of Black bile came up which
must have been some relief - He
was so fatigued after this sickness
that he desired to go to bed and
he slept for three hours, but
I am glad to say awake just
as usual & talking as fast
as before the sleep & has continued
strong in our service, at times
very much out of temper
but no violence yet. However
without any chance of
sleep ~~before~~ Yours &c
Wm Pitt
