

May 8 &amp; 9 1810

Tuesday Night

My dear Papa - I am thankful to be able to say  
 dear Amelia's cold is not worse to day  
 & Dr. Price does not find her more  
 heated than yesterday, and if you  
 can be kept off the still matters  
 himself, the inflammation on the  
 chest as well as Pain she  
 complains of a cough the Surgeon may  
 be nothing of consequence, however  
 he says as long as the Weather  
 remains so unsettled, she must  
 be very careful of more cold  
 therefore would not let her  
 get up but for to go into  
 the warm bath - The Surgeon has  
 her but independent to day &  
 her spirits low in consequence  
 of the idea of travelling with  
 Mrs. Willoughby to ~~London~~  
 I am your affectionate Son  
 Geo. Dabell

Wednesday  
 continued bad and off in nearly  
 five hours sleep. — The chest  
 is very indolent this morning  
 & she is inclined to cough a good  
 deal — The strong medicine  
 was not taken last night  
 which may make the sore  
 more painful now — but do the  
 strength with a much cold  
 about her it would be better  
 to put it off till to night —  
 Thinking it likely by a letter  
 she received from Sir H. Hall  
 last night that he <sup>was</sup> coming  
 come & we counted & decided  
 about the dose herewith as  
 Sir H. says in reference to Op is  
 "If the chest does not get better  
 I think I ought to move & give  
 you some assistance & as the  
 Op is very low perhaps a visit
