

? 14 Jan. 1810 (see  
12/129] according to Professor  
Aspinall (493)

[May? 13 1810]  
(C. Geo. = 15326)

Sunday night

My dear Mr. Porter

I am most thankful  
to be able to say that the Play<sup>ers</sup>  
found Amelia's Pulse better  
yesterday than they had  
yet & in every respect  
most every were satisfied  
however they will not allow  
me to go as far as to call  
her better. The same plan  
is to go on - The cold weather  
affects her very much  
& for fear of taking cold  
they advise her to keep  
as much in bed as possible

I wish I could add she was  
 in a less suffering state  
 for the pain in the side  
 continues much the same  
 & at times she has not had  
 grains in her head —  
 She desires her love to  
 you & is very sorry to find  
 you have suffered as  
 from your eyes she  
 wishes as well as myself  
 you are much better  
 than unfortunate  
 friends of the Palace  
 respects her very much

? 14. Jan. 1810 [see  
12/129] according to Professor  
Aspinall (493)

[May? 13 1810]  
(G. Geo. 15326)

& through the defects  
 all may turn out well  
 yet the accidently and  
 unexpected is much  
 successful to all those  
 who live there —  
 Amalio makes you  
 to leave the building  
 to read her some  
 more coffee & as much  
 as you can — Mrs  
 Goshen is very ill  
 in our very country  
 about her name is  
 there we venture  
 to the Amalio

the last draft has some  
nearly three miles  
with a 100 degree & some  
from & I have had some  
change of necessary business  
in a hurry & enclosed  
all as she is it is better  
they should not send  
I play is quite well  
Yours truly  
Mary
