

Wm. 1807

? Sep. 1810

My dear Brother

As I have said nothing  
new to say concerning  
Amelia for the last  
three days I have not troubled  
you with one of my reports  
but as I think you have  
begin to get anxious I  
take up my pen to say  
that Amelia's cough has  
continued much the same  
but I will now when come  
down to day say the  
inflammation in the  
lungs for the present is  
over & he thinks the  
cough is turning to

Wm

I have the same every thing  
 depends on her consent  
 being kept as gentle as  
 possible & she ought to be  
consulted in every thing  
 to make her as comfortable  
 & happy ~~as~~ as possible  
 without being worried about  
 anything which entire  
 trust in our house is  
 very difficult - and with  
 such a fine creature  
 as she is who possesses  
 such delicate feelings  
 it requires great care  
 to manage her well

The  
 will  
 be  
 Obed  
 to  
 you  
 her  
 to  
 you  
 In

The answer is better but not  
 out of your power and the  
 copies to do without a  
 Pleasure as the answer  
 both have done been a  
 great deal of good  
 God bless you I wish  
 to hear from you  
 You are not well

Yours  
 Wm. 1810
