

Sep. 16 1810

My dear Brother

I am desired by Amelin  
to inform you that the eruption  
you saw the beginning of last  
week in the face has increased  
every day since & is now  
nearly all over the Body - the  
eruption & redness caused  
by this eruption is far beyond  
any thing I ever discerned  
& parents all not except today  
Sir Henry Duff came to  
see his last night the  
feels of much more  
since he saw his last  
Sunday but is decidedly  
in opinion with the Paper that

It has no alarming appearance  
 at this moment, but that  
 she requires great care to  
 prevent Quinsy - the Pulse  
 keeps up & strength likewise,  
 but fears it will be some  
 time before this complaint  
 goes quite off - She keeps  
 quite in bed as she is in  
 some she could not get up  
 Her posture & respiration  
 is but new to your trouble  
 You will not be surprised  
 to hear of pupilla the  
 edifice no more than  
 ever put her as is

Sep. 16 1810

no part of the things but she  
 has in a more suffering  
 state than at the  
 present time & really  
 never makes a complaint  
 but when she can not help  
 it - I hope your gent is quite  
 gone -  
 Yours truly  
 Mary
