

[1818]

Windsor Castle Jan 24<sup>th</sup> 1818

My dear General Buxton  
 I came to this place on  
 on Monday & found the  
 General so well with  
 shortness of breath &  
 so my love which hardly  
 I had the heart to write  
 & I would not also in  
one line I had had a  
good talk with Mr Bay  
Helford - for some of your  
your very kind and generous

when from my own  
~~own~~ own fears, as I am  
 I was greatly shocked  
 at the Queen's look &  
 appearance altogether  
 seemingly unwell &  
 looking much thinner  
 & unable to speak of  
 all — she is much  
 better to day & yesterday  
 & I think she has  
 been greatly ~~well~~ well

[1818]

starts by opening his  
 the starting of his  
 does not come from  
 water & that he has  
 no appearance of that  
 complaint & that he  
 will be able to relieve  
 & keep down the  
 complaint from time  
 to time by medicine  
 though he does not  
 pretend to cure him  
75 years of age &  
 a complaint in itself

but the great object is to  
keep up her stature and  
bring up every thing  
demanded, especially it is  
that we have found  
state & we have particular  
about the shortness of  
nothing is when we  
any melancholy surprise  
it was in pleasure  
night came sudden  
death thence she  
must be told that is  
the recovery she should  
have made

acquainted with the motto  
 great care & by degree  
 & all that come to help  
 from the (that every  
 effort and the weight  
 to be shared — So why this  
 is but an express state  
 of things, any element  
 of them is impossible  
 & the idea of every  
 thing resembling to  
have both partly &  
partly makers and  
makers for all

but we must do the best  
we can & pray God to  
support us & try our  
best all our anxiety  
from the - Prayer & con-  
stantly - God bless you  
I have now just  
received  
I remain in all  
affection when I will  
write again - I have  
seen in the letter for  
the paper note you  
this day -
