Weymouth

My dear Mr. Paine

I think it may be a satisfaction to you to hear from me to day as I can assure you Amelia has gone through with her usual fortitude the making the Spine on her side which as she has given you the account how it has been done I will not trouble you with a repetition of it has left her little weak & low therefore I hope if she has quite out of spirits you will not forget it was almost immediately after all she suffered that she set down to write to you for believe me she is full as well as we have any right to expect after so much pain - but may God her fortitude and resignation may be rewarded

in time by the Blessing of returning
 health. Dr. Pope is very decided in
 opinion can expect the side to be
 any better until a proper discharge
 is produced. The cough he finds
 better but in all other respects
 I fear we are just as we were
 as the side remains very tender
 to the touch as well as the
 constant inward pain which
 never leaves her night ^{or} day
 We must not for half an hour see
 the sands but as the side was
 very sore we could not remain
 longer. Dr. Pope has promised
 to stay in till Sunday when
 if he is not quite satisfied
 with the appearance of things
he will not leave us thence

Dr Pope upon taking at the side
this currency is very well satisfied
with the discharge that has
been already produced by the
Peas, but does not expect to
be able to give a good receipt as he
thinks the money will
much sooner from the
side - I shall add to him
during the amount of the
receipt - I'll return
to us to know he writes
we send the two copies
his party much at
your service as it is quite
an old General Party all

He passed one day at Lord Pimblett's
which he says is a very fine
house & comfortable at the same
time nothing ever was so
kind as both Lord & Lady Pimblett
was ever to Lewis —

Give me love to return your
thanks for your recent

on the 7th
Amelia has passed a very
unpleasant night from fever
& is very uncomfortable to say
under the influence of strong
dose of calomel & as she complains
of the sore Dr. Pope talks of
bleeding her to see the state
of the blood —
