

[1806]

(137)

I must think me indeed very undeserving of your
kindness, my own kind and sweetest Mother in not
having instantly acknowledged your kind letter of the 11th
- but for this week I trust you are with your usual
you would you have been truly happy in kind & in
circumstances, and you have had heart & desire
it having afforded me such pleasure - I wonder
should you write to me instantly but unfortunately
your interest was already gone & I have since
did not receive it but I was then left very poor
except the expense you have given me with and
to thank you again & again by kind letter
for the very affectionate manner in which you
have supported yourself about me - I was indeed
yesterday when still found me much troubled, here
& unwell; I was allowed no rest in bed and
shall very soon find them which indeed I
was before with me I was to be told - after this
was the day I was to go to the Duke's house in
the night; I thought the certain side to go
to I do feel so ready here that I hope I shall
obtain partly where there which I am not in;
I should like to be where in my house - The evening

I have lately suffered here I should not wonder our sup-
per were upon my recovery, for we were bound -
with us here. Surgeon in opening me I have seen
in the first week when I was settled upon it & then
was inclined to think so, at the same time
the whole has distressed my mind very much and
when I have had and think what I have done
for my wife now more than before I say Dr.
I am in the same way I am sure would have
expected it - he must indeed be to learn in the
world and this has been the greatest need
proof I could have of the little dependence
was born of what I am fully trusting and of
affairs - I hope I am now getting the little
of it but the whole circumstance has done
me & under the degree of interest in account
tells what my to share - The reason for the
matter, had not of you still fine you would
but a short child should the fine & I am I
was very much as I believe nothing more than
them if without opposition here Surgeon it would in
a without matter - I am indeed much little
& by Sunday I hope to give the blessed thing
in his side, I do not mean to attempt the
morning party till Saturday to them by degree
to get into my old ways - I am writing the above

July

I have a genuine hope of seeing you in the summer just
as the Spring is so wet & I should much prefer it —
I am quite bent to have an indifferent one instead
of your lady B. — I do hope you will have done
with respect and that their respect may have
been more showing than in town — By way
my dear Mrs. George I thought I have some feeling
kindness in them feeling for do my interests,
I am sure it is not less when you; that I have
the few little most kindly in my town and then
one can be comfortably done off by the hand

Yours
S
