My Dear Lady Margaret

Small impetuous letter

I repeat my thanks for the most
kind & beautiful thing at this
particular of her benevolence from
you. I wish I could write to her
to persuade her to believe half
what I really feel about the
contents of the other & other
letters you would not think
it probable I could press it upon
them even every bad woman
is of hering myself withing
much. I wish that you should
of care me. Better impression it

not the less I should like to see something
 that the convenience of such business
 I wish to see but the thing
 are likely to be better done & I should like
 to see but to the last I should like
 accounted that I feel as you collect
 circulation in it but I should like
 you to think that I should like
 course of a long ^{of a long} ~~of a long~~ ^{of a long} ~~of a long~~
 matter but that it is a matter
 which much more belongs to it
 when the paper is in full circulation
 that" he is not to have the
 to change in business but to be
 I feel most unconcerned
 of the matter & the other
 delicate attention of meeting the
 day of publication is reported as follows
 it will be a proof of showing
 happy over that one in venue

in the future, please to put together
 with them both enclosed a packet
 mine. To be enclosed I feel much
 obliged, because Government
 not know of this part being
 of them. — I cannot be
 called a friend in saying that
 glad you should yet suffer
 me being any in this way
 before is that that is
 that if there were no impediments
 but for every other it
 be better to have some

 when the result of your
 first visit in June & that

just as it contains the thin

parting of the down will ever

I flatter myself it will be
more as an answer to every

 the / that my long stay probably
 of your leaving this country as I
 cannot but reflect on the uncertainty
 of things & what my fate may be
 before you return must see your
 absence of coming over in the
 next summer gives me some reason
 for your having made nothing ^{very} happy
 yet as is the fate in most things
 that I think the lecturing is not
 so that alloy. Am I asking too
 that in visiting again the wish
 of being often before you have this winter
 September - Perhaps however
 perhaps my health would not

as I had been kind of help, and in
 it I must ^{my} protect you from ^{your} ^{own} ^{hand}

 assured of your ^{own}
 then being called for
 by ^{you} ————— I have been obliged

to make this to tell you of my disappointment
 & dismay at the thing I entrusted ^{to} ^{you}
 to be executed here not being finished
 as I had so anxiously wished to send ^{you}
 I have sent a ^{copy} ^{to} ^{you}
 in ^{order} ^{to} ^{send} ^{you} ^{the}

I would be so far as to say that the
it is finished improving. This has been
done by his quite unostentatious method
of having a note of copy in
one line above for today
