

June 11 1809

Your truly kind and friendly letter June 1. I read with pleasure and I feel it
 as I ought; not a little pleased believe me at the prospect it contains of the suc-
 cess of that business which has been so much talked of since I showed you
 I cannot express how I am worried upon this and business I thank you a
 thousand & a thousand times for the kind advice you give me of keeping
 down of being further troubled in it which I shall abide by, I was told
 you the enclosed from Anne which I received last night. I wish you very
 much to send it as it will show you how determined she is as she
 that she makes no objection of her visit & certainly where
 I believe to her Anne was displeas'd with Mamma for afflicting the one —
 I am best pleas'd to hear more that as she promised faithfully to give
 the subject further consideration I wd' take no step till she saw me
 next I trusted in this Interim I should have from her word that she
 would be able to tell me she had join'd up her plans; from
 that day till last night I had not heard one word of the contents of
 her letter from that all my enquiries in that bedroom were of no
 avail — It is indeed in the scheme and must end in the ruin of both if
 either Prussia you will see that she will not make the plan of battle &
 consequently the operation will be very? then trouble will come out and
 this subject will be conceal'd; indeed I am miserable about the whole
 and I entreat you my answer to the which I see, unless you would
 send it if you approve it return it by the post & I will send it to
 her — I hope I have not said too much, advice I give none — Since
 writing the above I have received a letter from Mamma which she was very
 so I am a heart at having said a word you had prejudic'd ever was
 done; I was in hopes that my staying in London & Interim of

Princes could have kept Dr. to some terms and was anxious to show
 her that we must follow the other in $\frac{1}{2}$ w^o than have prof in
 her opinion I remain that her words were true in regard to George's
 wanting the situation - I am truly sorry I have not succeeded in doing
 just I am sure you are right in all your reasons, but Dr. says I do.
 I am in fact that you be joined for supporting Dr. Virginia and the
 question is just; then his father must have promised to eventually if
 the Dr. is desirous of saving them she will become Whore I am
 to me just it in favor of $\frac{1}{2}$ if she has any proof that Dr. has
 wished to interfere or ingrained into the mind like we know Dr. is
 the Dr. & unarguably show she to be it the Dr. W. has a right
 to take the head - I am in George's reason she has no wish for
know why cannot some George transmission be found & I do not
 be made satisfied with a certain know and then let Dr. manage
 the rest without my interference - but knowing what you know
 and George's letter I take evidence it and trust you will take the rule
 for the head & forgive my sense of judgment - I am in truth by
 surprise & in answer to some terms that I really hardly know what
 to say I am in hopes this negotiation would bring little to their view
 for I had Dr. that Wednesday that one in the negotiation would be
 rather more to them & further I will not stand by your advice
 and give them some of mine - Dr. acknowledged the truth of this
 but said she was certain Dr. never would rejoice & therefore she was
 quite easy on that - George is for will be depended upon my speaking
 again to $\frac{1}{2}$ and indeed I will not go in they are wished to ruin
 themselves as it must be; but in all this I shall be guided by
 your advice I am Dr. you cannot take the right of my hand
 nothing but I cannot help it - God bless you and believe me ever

Tell me if you approve of my writing Dr. Your sincere friend
 and that I will not speak again to $\frac{1}{2}$
 From Princess Sophia
