

R. Ryder to?

41428 - 9

Whitehall Nov^r 14
1818

Lord Mulgrave and I
have seen the Physicians
at Windsor this morning.

We did not receive from
them any material informa-
tion upon the state of His
Majesty beyond that which
they had already commu-
nicated in their bulletins
and private letters.

Their general Opinion

R. Ryder to?

41429

upon that State, appears
to have undergone ~~no~~ change
since Lord Liverpool & Harrow
saw them on Saturday; and
I therefore enclose Lord Liverpool's
note, because it contains as
correct a result as I could
give of our Interview with
them today.

The Amendment, since,
the leading symptom of which
seems to be that His Majesty
converses in a less emphatic
manner before his Attendants

has of course increased the
chance that it may be
possible for the King's recovery
to have made such progress
before Thursday ^{morning} to enable
him to do an Act of State
but the Physicians were
evidently as unable as they
were on Saturday to form
an opinion upon the time
which such a progress of
Amendment ^{would} require
and it was a point upon which
we did not press them
