

Mr Robt Keate has the honor to report for the information of His Royal Highness The Prince Regent that the Complaint in The Princess Charlottes Face, as well as the general state of Her Royal Highness's Health, continues to improve.

The cold Sea bathing has had a very beneficial effect and continues to agree with Her Royal Highness in every respect.

There is still a considerable degree of thickening below the joints of the  
Face

Knee - all the other surrounding parts  
have nearly resumed their natural  
size and form.

Robt. Keate
