

50046

Dr Baillie presents His Humble duty
to the Prince Regent - as the Princess
Charlotte appear'd to be quite well
for more than two hours after Her
delivery, and the fatal attack came
on very suddenly, without any obvious
cause, it is extremely desirable, that
an anatomical examination should be
made - Dr B. therefore ventures to sug-
gest this measure to His Royal Highness,
that the proper order may be given, if
it meets with His Royal Highness's ap-
probation - The examination need not
be made earlier than Eleven or Twelve
o'clock to morrow -

Thursday Nov 6 - 1817
