Louisbourg April 4th, 1000

Sir

I ought to apologise to
Your Majesty for the liberty I
am going to take but hope that
You will be graciously pleased to
forgive me if my Application is
improper. A Baron de Wöllwarth
whose estate is situated near Salsbica
has six Daughters of which only
the two eldest are provided for.
The one being Maid of Honour to
my Sister in law Princess Ferdinand
she wishes me very much to
entreat Your Majesty to place
one of them in the Convent of
Wunsdorf I objected some time

Thinking these places were only for
the Noblesse of the Electorate, but
am assured many others have also
been in these Convents. I should

Your Majesty grant this request

I have enclosed the name of one
of these Young Ladies and must
again entreat your pardon if I
have asked any thing wrong

Our Weather is very uncertain
some days warm others cold enough
to snow, the vegetation is vailly
backwards at present. I am

very much pleased with the
additions the Duke has made
to his Garden and think some
spots would please Your Majesty

for indeed it is astonishing to see what
but has been done in two years after
also finding every thing in a ruinous
condition. The very ground before
the House was let and every where
the beauty was destroyed by parting
with great part of the land which
had either been sold or let on long
Leases: the Duke by degrees tries
to recover these grounds and if
God grants him life I am sure
will make this the most beautiful
place in Germany.

The Duke begs that I will
prevent his humble duty to
Your Majesty and I will now
take my leave entreating You to
