My dearest Brother

Though You are
not fond of writing I am sure that
You have ever shew'd me too much
Affection not to like to hear from me
sometimes; I therefore seize with
pleasure on every opportunity of
recalling myself to You and as M^r
Smith has offer'd to execute any
commissions I may wish to give
him, I have begg'd him to deliver
to You this Letter and a set of
Subsector Buttons which the Connoisseurs
say are fine specimens of that
Stone I wish they were more

worth Your acceptance but trusting
to Your Affection am sure You
will take the will for the deed.

I am delighted my dear Brother
with the accounts I hear of Your
charming little Girl, the Queen and
my Sisters speak of her with great
Affection: and Lady Elgin is also so
good as to write to me about her,
knowing how anxious I am that
Charlotte may turn out every
thing that can contribute to Your
happiness. Every body speaks of
her Marvellous Talents which I
am glad of as I know it will
give You pleasure - Since the 2^d

we

we are settled here and I am very
 much taken up with altering my
 House and planting my Garden to
 which the Severity of the Winter
 has done much mischief - The
 Papers mention your building again
 at Brighton I hope that these
 alterations or additions will be
 finished sooner than mine which
 have been put a stop to by finding
 two Beams quite spoilt, however I
 am fortunate in their having been
 found as the whole Structure
 would have sunk had these Beams
 remained. - I will now say
 dear Brother take up no more
 of your time and only add my

Love to Charlotte and the Decker
best Compliments to You. Adieu
and believe me ever dear Brother
Your most Affectionate
Sister and Friend

Charlotte
