Louisbourg June 17<sup>th</sup> 1704 <sup>OK</sup>

Sir

I cannot deny myself  
the honour and happiness of  
writing to Your Majesty by  
Lady Langton who has spent  
several Months here. I regret  
her being oblig'd to return to  
England as I found great  
pleasure in her Society. She has  
spent the last two days here and  
I have shewn her every thing at  
Louisbourg that she may be able  
to give Your Majesty an account

of a place I have so often  
taken the liberty to mention  
and which I think would  
even please those that have  
seen Windsor and I am as  
nature has done almost as much  
for it as Art. I am very  
partial to it and spend great  
part of the day in the Grounds.  
My own Garden though small  
gives me much amusement, at  
present I am adding three  
Acres to it which I flatter  
myself will be a great improve-  
ment. — The Elector who is very

fond of farming how beautiful  
Cows which are chiefly Swiss I  
regret that the distance is too  
great to send some to England  
as I am sure Your Majesty  
would admire them very much  
and that they would suit very  
much the Flemish Farm. I  
believe that they would even  
improve in England as I think  
they are too much confined here  
to the Stable

The Elector desires me to  
present his humble duty to  
Your Majesty and I remain
