

Certificate of the D. of
Gloicester's being out of danger
Signed by the Physicians and
Surgeons Leghorn Oct. 25. 1771

54321

We whose names are underwritten
having the honour to attend His Royal Highness the
Duke of Gloucester during his present indisposition,
do give it as our firm opinion, that His Royal
Highness / by the blessing of God / is at this time out
of danger of his life; and we flatter our selves that
providing no unforeseen accident, which God forbid,
should interveen, His Royal Highness will be
restored to his former state of health as soon as the
nature of the distemper will admit of.

Leghorn the 25th October 1771.
