

Patrick Capland to Duke of ⁹

Mar. 2 1784

5783

My Lord Duke

I am extremely sorry ^{that} another source
Astronomical cold & fever have confined me to bed for these two
days past & prevented my answering your Grace's Letter in
course.

I did not keep a regular register of the Thermometer during
the continuance of the snow on the ground; but I thought the
cold so remarkable on the two last days of the year 1780. that
I observed it frequently, & have indorsed a copy of the ^{thermometer} height
at which it stood, particularly on the night between the 30 & 31st.
I learn from Glasgow that on the same night the Thermometer
stood at 11° below zero or 8 $\frac{1}{2}$ ° below what it stood at here, and I
believe your Grace knows that at the Macfarlane Observatory
there in 1780 it sunk to 25° below zero, when laid on the snow.
Yet unusual as such a degree of cold is in our Islands, it is
moderate, when compared to what is frequently experienced in Si-
beria. The libel D'Anvers tells us, that at Selikamski

the Spirit of aerial voyages that I little doubt my
being enabled to pay my respects to your Grace in
one filled with heated, instead of inflammable air,
before the month of June; sooner than which time I
fear these aerial Journeys would prove rather cold
and uncomfortable.

I have the honour to be with the greatest respect
and esteem

My Lord Duke

Your Graces most obliged
& obedient humble servant

Mans: College March 2^d
1784

Pat. Capland

P.S. Has your Grace ever seen any of the Meches economiques
of Mr De St Leger. — They make any kind of oil or tallow
burn without smoke, & would be extremely useful in small
Lamp furnaces for blowing Thermometer balls &c.

Mr. Tolson

A Snow came on in the evening, since which time I have never observed the Thermometer below 22°.

The preceding observations were made with a Thermometer which I had graduated with great care according to the Rules laid down by the Royal Society. It was sometimes laid on the surface of the Snow, in the middle of a large Garden to the East of the City, and sometimes suspended at different heights above the ground, from two feet to seventy. This was done in order to discover whether there was any great difference between the colds on the surface of the snow, & in the Air suspended above it, as had been found to be the case at Lützenburg, in a very remarkable degree in 1780. But thro' I attended to every circumstance which I thought might influence the result, I could in no instance perceive that the difference amounted to more than half a degree.

The wind was a gentle breeze at East, & on the morning of the 21st Dec^r the Planet Venus & all the fixed Stars, shone with a Splendor I had never before observed.

Stade Vendredi a 4 heures

Sire

Nous arrivons dans ce moment très
heureusement & j'ai saisi le départ de la
poste cette après midi pour en informer
votre Majesté. Nous avons été trois jours
à défendre la Rivière, un très bon vent
nous a conduit ^{deux} mercredi matin à Holyland
& de là nous avons eu quelque difficulté à
gagner l'entrée de l'Elbe avant la nuit.
Le Prince est bien en general, mais se plaint
de temps à autre de son mal au côté. Je n'ai
qu'à me louer de S. A. R. pendant notre

voyage, en arrivant ici les Principaux
 officiers civils & Militaires se sont trouvés
 lorsque nous avons mis pied à terre, le
 Prince les a reçus avec politesse & dignité.

Le Cap: Linsing est ici depuis deux jours
 & nous partons demain matin.

L'on ne pourroit pas choisir un officier
 plus propre que Le Cap: Vandeput pour
 conduire Le Prince, sa conduite a été en
 general & en detail telle que je ne puis pas
 m'empêcher d'en faire les éloges a votre Majesté.
 Tout a été parfaitement bien dans le yacht

M. Gen. J. Budé

5785 (2)

Le domestique de votre Majesté & surtout
M^r Ricc^o ont été parfaitement attentifs
& ont montré le plus grand desir de plaire.

Le Prince Guillaume a écrit à votre Majesté
avant de venir à terre, & je ne manquerais pas
à votre arrivée à Hambourg d'avoir l'honneur
plus en détail à votre Majesté.

Je suis

Sire

De votre Majesté

Le très humble & très
obéissant serviteur

J. Budé

1887

The first of these is the fact that the
 year has been unusually dry. The
 fact for October was only 1.5 inches of
 rain. The second is the fact that the
 amount of ground water is very low.
 The third is the fact that the
 amount of water in the rivers is very
 low. The fourth is the fact that the
 amount of water in the lakes is very
 low. The fifth is the fact that the
 amount of water in the streams is very
 low. The sixth is the fact that the
 amount of water in the ponds is very
 low. The seventh is the fact that the
 amount of water in the ditches is very
 low. The eighth is the fact that the
 amount of water in the canals is very
 low. The ninth is the fact that the
 amount of water in the reservoirs is very
 low. The tenth is the fact that the
 amount of water in the tanks is very
 low. The eleventh is the fact that the
 amount of water in the cisterns is very
 low. The twelfth is the fact that the
 amount of water in the wells is very
 low. The thirteenth is the fact that the
 amount of water in the springs is very
 low. The fourteenth is the fact that the
 amount of water in the fountains is very
 low. The fifteenth is the fact that the
 amount of water in the showers is very
 low. The sixteenth is the fact that the
 amount of water in the baths is very
 low. The seventeenth is the fact that the
 amount of water in the washhouses is very
 low. The eighteenth is the fact that the
 amount of water in the laundries is very
 low. The nineteenth is the fact that the
 amount of water in the kitchens is very
 low. The twentieth is the fact that the
 amount of water in the dining rooms is very
 low. The twenty-first is the fact that the
 amount of water in the parlors is very
 low. The twenty-second is the fact that the
 amount of water in the bedrooms is very
 low. The twenty-third is the fact that the
 amount of water in the bathrooms is very
 low. The twenty-fourth is the fact that the
 amount of water in the closets is very
 low. The twenty-fifth is the fact that the
 amount of water in the drawers is very
 low. The twenty-sixth is the fact that the
 amount of water in the cupboards is very
 low. The twenty-seventh is the fact that the
 amount of water in the shelves is very
 low. The twenty-eighth is the fact that the
 amount of water in the tables is very
 low. The twenty-ninth is the fact that the
 amount of water in the chairs is very
 low. The thirtieth is the fact that the
 amount of water in the sofas is very
 low. The thirty-first is the fact that the
 amount of water in the beds is very
 low. The thirty-second is the fact that the
 amount of water in the pillows is very
 low. The thirty-third is the fact that the
 amount of water in the blankets is very
 low. The thirty-fourth is the fact that the
 amount of water in the quilts is very
 low. The thirty-fifth is the fact that the
 amount of water in the sheets is very
 low. The thirty-sixth is the fact that the
 amount of water in the towels is very
 low. The thirty-seventh is the fact that the
 amount of water in the handkerchiefs is very
 low. The thirty-eighth is the fact that the
 amount of water in the napkins is very
 low. The thirty-ninth is the fact that the
 amount of water in the tablecloths is very
 low. The fortieth is the fact that the
 amount of water in the curtains is very
 low. The forty-first is the fact that the
 amount of water in the carpets is very
 low. The forty-second is the fact that the
 amount of water in the rugs is very
 low. The forty-third is the fact that the
 amount of water in the mats is very
 low. The forty-fourth is the fact that the
 amount of water in the floor coverings is very
 low. The forty-fifth is the fact that the
 amount of water in the wall coverings is very
 low. The forty-sixth is the fact that the
 amount of water in the ceiling coverings is very
 low. The forty-seventh is the fact that the
 amount of water in the furniture is very
 low. The forty-eighth is the fact that the
 amount of water in the decorations is very
 low. The forty-ninth is the fact that the
 amount of water in the accessories is very
 low. The fiftieth is the fact that the
 amount of water in the household items is very
 low.

Wm. Pitt
or K. M.'s reply

Mar. 21 1784

5790

Mr Pitt has not presumed to trouble
your Majesty, as from the impossibility
of carrying the American Bill to the
House of Lords sooner than tomorrow, the
dissolution does not appear to be practicable
till Wednesday. Mr Pitt is therefore not
under the necessity of entreating your
Majesty's Permission to attend you, till
after the 21st tomorrow, unless your
Majesty is pleased to require his Attendance
sooner.

Wm. Pitt
to A. M.'s reply

Mar. 21 1784

x
Having by the Minutes of the House of Commons of Friday seen that the American Trade Bill was only ordered to be engrossed, I did not expect Mr. Pitt this Day. I can easily imagine that the day is not long enough for him to execute all that may be desirable, therefore shall certainly not call on his Attendance before the usual time tomorrow after the Levée. If the business of Parliament will admit of its being Dissolved on Wednesday I shall certainly be ready to go that Day to the House. but I am not clear the American Bill can be ready before Thursday.

Parliamentary
Business

H. R. G. Drummond

Mar. 22 1786

5791

Mr. Drummond may be surpris'd to receive this from
Me; but being under the necessity of raising a sum of
twenty four thousand Pounds, and chusing to deal with
a Gentleman rather than a drooping myself through
others to the Common sort of Moneyed Men, and not
thinking it fair to have sent abruptly to Mr. Drummond
and make my application to him. I now write that
He may consider of it before I send to see him.
What has occurred to Me is that I am willing to
give such a bond as Mr. Drummond may think
necessary with an assurance of repaying three
thousand Pounds every three Months and of paying
Six per Cent for the Money.

By the Account I settled with Lord North
when he quitted the Treasury he stated that I owed
thirteen thousand pounds to Mr. Drummond, of which
I have paid through the hands of Lord Brouncker seven
thousand pounds; the other six is still owing, and was
kept back at the desire of Lord North. He having a personal
account to settle with Mr. Drummond on which subject I fear

He has not acted very explicitly. He has never explained
this as yet; this indeed has the more made me on the
present occasion not wish to employ a middle person
consequently the bond must be for thirty thousand
pounds at five per cent; three thousand pounds to be
repaid every three months, and in case any accident
should happen to me I am willing that a sum of money
I have in the stocks belonging to my German Dominion
shall be a collateral security that Mr. Drummond
may run as he sees fit.

Joseph of a letter to
Mr. Drummond
written London Nov. 22. 1752

- Drummond to H. H.

No! March 1784 AA.

Mar. 17 (sic) 1784

5792

M^r. Drummond's Family & self, are ever happy to shew their duty to his Majesty & their Attachment & zeal to his Service. But that the very particular & pressing circumstances of the times renders obedience to his Majesty's Commands most difficult

That the delays which have happened in making all Publick Issues have occasion'd such a scarcity of cash for the necessary Circulation, that it is become almost impossible to convert into money the Mortgages, Navy Bills, & other Governm^t. Securities, which they & other Bankers have in their Custody, and thereby creates a Distress to them never before felt

That it would be in their Power to Aed his Majesty, by assisting with the most undoubted securitys Adequate to the Sum wanted, if any means could be found to obtain Cash on them: But that to take out of their present Circulating Cash such a Sum at once would run a risque of Disturbing them too greatly and in the present ^{moment} of the fluctuation of the times, & sudden Demands which come unforeseen, would be beyonding too much w^or for the danger which might arise to Publick Credit as well as themselves.

That if the money is not wanted all at one time, But that it will answer the Exigencies of his Majesty If the

- Drummond to H. H.

No! March 1784 AA.

Mar. 17 (sic) 1784

money is drawn for so, as the whole
be not payable before the end of the
month of May; They will from that
Duty they owe to his Majesty & that
affection they have to his Government
consider whether it will not possibly
be in their Power to give the Aid desired

That in respect to the other Subject
mentioned, Mr. Drummond begs leave most
humbly to lay before his Majesty
a Copy of the security given by Lord
North to the Partnership on the loan
advanced for his Majesty's use,
which would not have been
advanced

Advanced but on that account, which
was transacted by his Brother in his
absence: That when the Six Thousand
Pounds mentioned by his Majesty to be
now arranged shall be discharged the
account will stand as by the Paper
annexed to the Copy of the Note
£17000 of the principal remaining
undischarged besides the Interest.

That the Partnerships are entire
strangers to ~~the~~ Transactions between
his Majesty & Lord North further
then that it was to be discharged
by Installments.

Mr Pitt has the Honor to acquaint your
Majesty that he has received an Answer from
Sir Th. Egerton, who wishes to accept
immediately the Distinction your Majesty is
pleas'd to confer on him, and seems to think
the County secure but does not name the
Candidate. Mr Pitt has not yet heard
from Mr Hall. Mr Pitt has understood

That Mr Smith, Brother of the Member for
Dorchester, has offered himself for Coventry
with a very good Prospect; and he hopes
some other Candidate may be found, altho'
He does not at present know of one.

Dorning Street.

Sunday March 28th 55th part 5.

Draft to Mr Drummond
Lucas House Mar. 28. 1784.

Lucas House Mar. 28. 1784.

5798

As Mr Drummond when I saw him the other Evening intimated an intention of going soon to Scotland I take this method of making my Proposal to him on the Subject of the twenty four thousand Pounds I wish he would advance to Me and which I mean to repay him at instalments of three thousand Pounds every three months, and giving five per cent interest for this above sum.

I wish therefore to receive on Paper an answer whether he will advance this sum on those conditions and that according to what I understood on Wednesday Evening that he cannot conveniently do it but by instalments of five thousand pounds per week. to take effect from the 15. of April.

If this is the case I desire he will send Me the form of the Draft he wishes I should sign for each sum, or the receipt on the delivery of each Payment and whether his son cannot be the person employed during his absence to bring the money to Me.

As to the conduct of Lord Perth on the other sum that was obtained from Mr Drummond it will enquire a thorough investigation which Mr Drummond may depend on my losing no time in having it effected.

[Faint, illegible handwriting on a piece of lined paper, possibly a letter or document fragment.]

[Faint, illegible handwriting on the right margin of the paper.]

Wm. Pitt

Mar. 30 1784

5799

Mr Pitt humbly presumes to submit
to your Majesty, that in endeavoring to find
a proper Person for the vacant Office of
Surveyor General of the Ordnance, None
has occurred fitter than Captain James Suttell,
who has some Parliamentary Talents, is
now fighting a Contest for Government
at Dover, and w^ould be very acceptable

To the Duke of Richmond. If It should
be your Majesty's gracious Pleasure to
confer this Appointment on Him, It is
desireable that the Warrant should
be made out as soon as possible, that It
may be announced previous to his
Election. - Mr Pitt understands
notwithsanding the Indignation
Representations of the Opposite Party that

Wm. Pitt

Mar. 30 1784

The majority at York was clear in favor
of government. He also begs leave to
submit to your Majesty, that it has
been suggested that it would give great
satisfaction there, if your Majesty
should condescend to shew your favor ^{to} the
Sheriff of Yorkshire, by giving him
the title of a Baronet, on the present
occasion. The Yorkshire Address

Mr Pitt.

Downing St. 30 March 74

Office arrangements
& Election matters

will be presented at the levee tomorrow
Mr Pitt has had further favourable
accounts from Coventry, and is in hopes
that a second candidate may be found
in the course of to day. A gentleman
of the name of Bird, who has connected
there is already gone down, Mr Smith
having withdrawn.

March 30th 1784. 30th Feb 1784

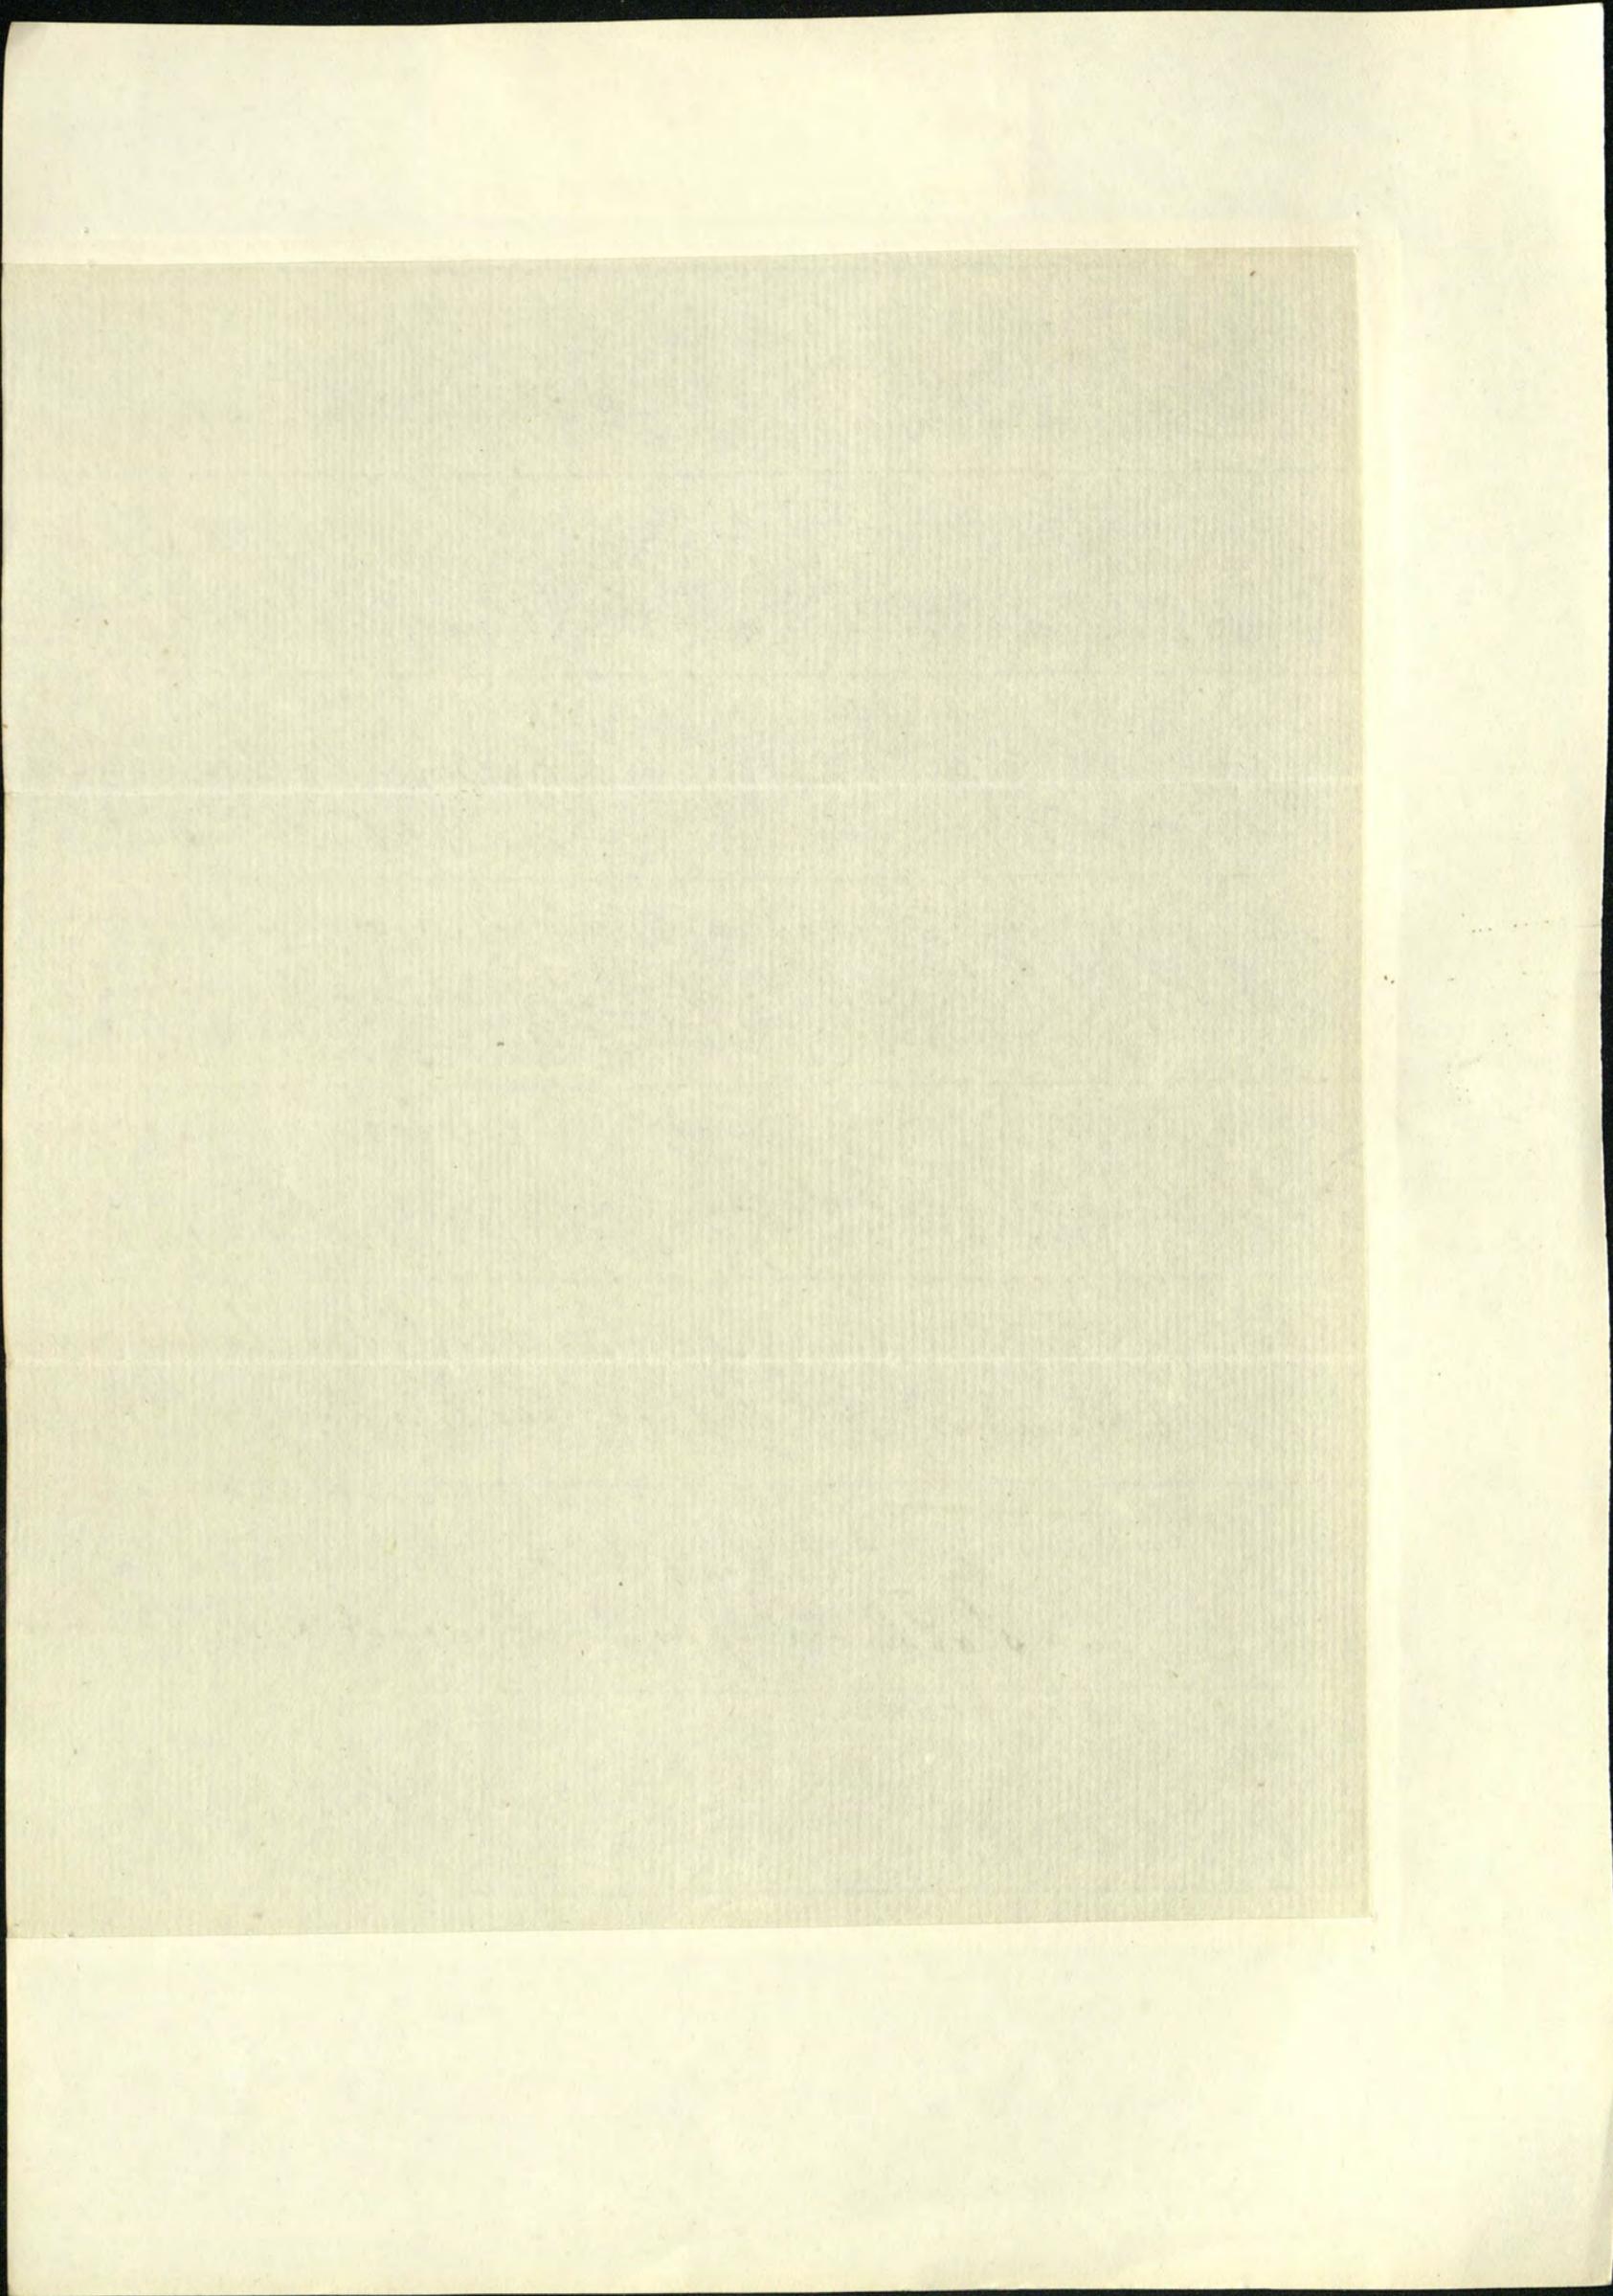

Draft to Mr. Pitt.
Windsor. 30th March 1784.

5800

Windsor March 30th 1784.
37 p. 7. P.M.

Mr. J. Luttrell I have always understood to be the best of that family, I have therefore signed the appointment of him as Surveyor of the Ordnance. Mr. Darby is of so good a family that I cannot make the smallest objection to his being immediately created a Baronet. I am happy to find two candidates are likely to be found to oppose the late Representatives of Lowcountry. I understand Sir J. Pennycuik declares Beverley is so opposed with Major Anderson that any fresh Man would probably succeed there. If Lieut. Gen. Robertson is so desirous of a seat in Parliament he ought to be encouraged to go on some of these hazardous exploits.

There has been a ridiculous attempt here of Mr. Pennycuik but a few hours convinced him that he had no chance against the late Members; Mr. Stoppel has this day sent to the few Tenants ~~he has~~ that a Candidate will still arrive before the Election which is settled for nine tomorrow morning but should one appear it cannot avail and as such does no harm.

Mr Pitt.

Downing St. 31st March 1784

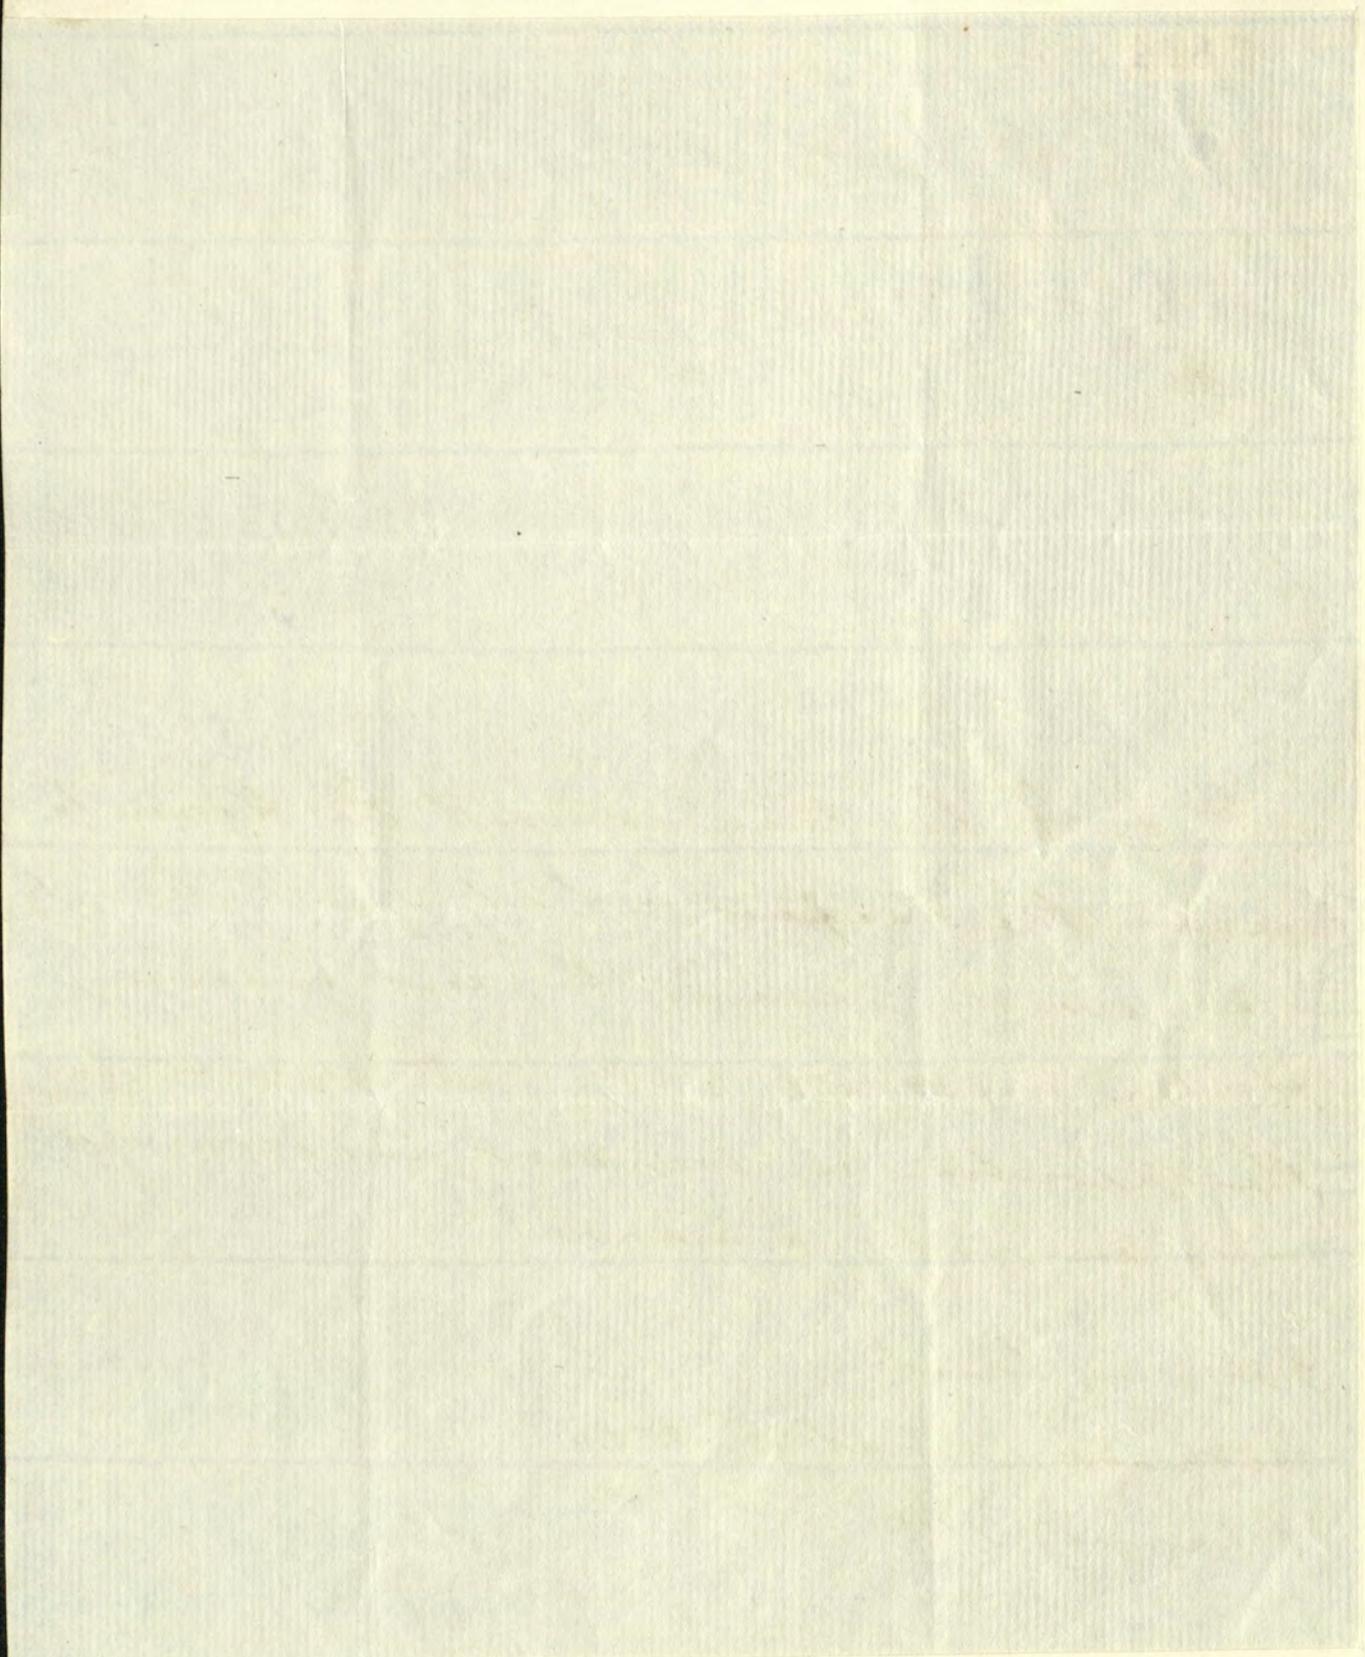

5801

Mr Pitt has this moment the Honor to receive the Packet which your Majesty is graciously pleased to send enclosing the sum of 5000 £. - Mr Pitt rejoices that the Opposition in Windsor has terminated in so dejected a manner.

Downing Street.

Wednesday. March 31st 1784.
