

Rev. A. Madaine to? Sir Joseph Yorke

July 3 1787

6274

H. Sir

The Princess Royal is returned to
Nimeguen after an humiliating detention of three
days nearly, in the hands of armed Russians,
— The reception she met with at her return was
expressive of the most ardent affection and the
impression made on the inhabitants of Guelderland
by this odious incident has extinguished
all remains of Patriotism in that Province —
a similar impression has been made in Zealand,
— Two mad patriots, commissioned by the Towns
of Dort and Leyden to seduce the inhabitants of
Middelburg from their attachment to the good
cause, have been treated by the People with
every mark of indignation — their yacht destroyed,
— their flag burnt, their persons saved by an
ignominious flight; and no body knows where
they are. Ten Patriot Houses were plundered,
the Orange Standard seized in all quarters
of the City, — and all in an uproar when the
Post came away. — Bloodshed has begun at
Arnhem and Deventer, — and it is likely to
spread every where. — The treatment of the
princess will certainly bring things to a crisis,
that must be nearly decisive.

The States General have expressed strongly their indignation against the step of the tyrannical Committee, who arrested her Royal Highness and declared, that if ample and signal satisfaction is not made for this insult, they will leave the Province of Holland unsupported & unassisted, to answer for its consequences. — The States of Holland met this day to deliberate upon the answer that should be made to the letter of the Princess — bellowing and invective ~~words~~ were not spared — but the assembly was too much divided to admit of a decision — so no resolution ensued.

The Burglers here are murmuring high, — and I am told this moment that the Infernal Committee are to send us in a few days a body of volunteers to disarm our Burglers, and mean to assign them, ^{former} a place of alarm & give them the Parole. — I am also told that to finish this plan, the Swiss and foot-guards, whom the Junta cannot trust will be sent elsewhere. — If this be true (I fear it is) the Hague, hitherto quiet, may become a scene of carnage. — If Tulmeyer were not a wretch unworthy of your attention, I would be circumstantial in the relation of his rascalities on this occasion. — But he is below contempt —

To Mr. Gieswell.

6280

Sir,

Inclosed I have sent you two receipts, one for the usual half-years salary, the other for the last half years extraordinary annual expences that attend the great telescope.

In a letter, which Sr. J. Banks laid before his Majesty, I have mentioned that it would require 12 or 15 hundred pounds to construct a 40-feet-telescope; and that moreover the annual expences attending the same instrument would amount to 150 or 200 pounds. As it was impossible to say exactly what sum might be sufficient to finish so grand a work, I now find that many of the parts take up much more time and labour of workmen, and more materials than I apprehended they would have taken; and that consequently my first estimate of the

total expence will fall considerably short of
the real amount; the annual expence how-
ever, as I intend to contrive it, will not exceed
200 pounds. I beg of you therefore to ask
the King whether it will please his Majesty
that I should communicate the particulars
of the further expence of the telescope to the
President of the royal society, in order that
he may, as before, take an opportunity to lay
the same before the King, or whether his
Majesty would order me to continue the work-
men and apply from time to time for such
sums as may be wanted in order to compleat
a construction which is now already in a
state sufficiently advanced to draw the attention
of all men of science in Europe.

I hope the receipt for the annual expence
is drawn up so as to meet with the Kings
